01

Category Definition & Market Positioning

What AUDT Is

AUDT is the **AI-Native Trust, Risk & Compliance Platform** - the Governance OS for modern organizations. It replaces fragmented spreadsheets and disconnected point solutions with a single, AI-native platform for vendor governance, compliance management, audits, risk, and board governance.

Dimension	AUDT Definition
Category	AI-Native Trust, Risk & Compliance Platform (Governance OS)
Tagline	Governance Built on Proof.
Primary Object	Vendor + Governance Event + Trust Signal + Asset + Agent Action
Core Outcome	Continuous, automated Organizational Trust via the Trust Operations Engine
Positioning	Category-defining OS - not a point solution. Replaces: TPRM tools, GRC suites, compliance trackers, risk registers, audit portals
Live URL	audt.tech + lekha-os.vercel.app India Data Residency (Mumbai)

Category Shift: From TPRM to Governance OS

Traditional GRC tools and TPRM platforms operate on manual workflows, annual reviews, and static spreadsheets. AUDT introduces a new paradigm: **AI-native continuous governance** where trust is computed, verified, and published in real time.

Old World (TPRM/GRC)	AUDT Governance OS
Annual vendor reviews	Continuous vendor monitoring with automated alerts
Spreadsheet-based risk registers	AI-powered Risk Lens with heat maps and live scoring
Manual compliance evidence collection	21 automated compliance checks + Evidence Vault
Siloed point tools	32-module unified Governance OS
Static audit reports	AI-narrated real-time board reports
No trust signal externally	Public Trust Certificates, Trust API, Verification Authority

02

Platform Architecture & Core Model

5-Layer Governance Stack

AUDT is architected as a layered monolith with clear separation between transport, business logic, data access, and infrastructure. All 32 modules share a single auth/session/RLS framework on Supabase Postgres.

Layer	Components	Technology
Intelligence	Governance Copilot, Agent Framework, Trust Intelligence, Benchmarking	Gemini 2.5 Flash + RAG
Trust Operations Engine	Event Engine (37 types), Workflow Engine, Automation, AI Decisions	Next.js Server Actions + Drizzle
Core GRC Modules	Vendor Hub, Evidence Vault, Risk Lens, Control Center, Audit Mgmt, 27 more	32 modules, 259+ tables
Platform Services	Activity, Search, Comments, Tags, Attachments, Tasks, Notifications	Supabase Postgres + RLS
Infrastructure	Auth (TOTP MFA, SSO), Billing, API Keys, Encryption, Webhooks	AES-256-GCM, bcrypt, Resend

Tech Stack

Layer	Technology
Framework	Next.js 16 (App Router) + TypeScript
Hosting	Vercel (Mumbai bom1) + Supabase (ap-south-1) - India data residency
Database	Supabase Postgres with Row-Level Security on all 259+ tables
AI	Google Gemini 2.5 Flash via @google/genai
Auth	Supabase Auth + TOTP MFA + Password Policies + Session Governance + IP Allow Lists
Security	AES-256-GCM (integration configs), bcrypt (API keys, passwords), HSTS, CSP, DPDP

03

Complete Module Map

All 32 modules are SHIPPED and live in production.

Layer 1 - Vendor Governance

Module	AUDT Name	Key Capabilities	Status
Vendor Management	Vendor Hub	25-col registry, AI extraction, NL search, magic-link portal, Trust Score	LIVE
Contract Lifecycle	Contract Governance	Contract library, clause tracking, obligation tracker, renewals, Contract Health Score	LIVE
Vendor Lifecycle	Vendor Lifecycle	State machine (draft to offboarded), contacts, timeline, renewal workspace, 9-step offboarding	LIVE
Asset Management	Asset Intelligence	30-type asset registry, dependency graph, PII tracking, asset alerts, AI advisor	LIVE
Vendor Rating	Trust Score	7-component 0-100 score: Evidence + Compliance + Risk + Assessment + Operational + Freshness + Contract	LIVE

Layer 2 - Risk, Compliance & Audit

Module	AUDT Name	Key Capabilities	Status
Compliance	Evidence Vault	ISO 27001, SOC 2, DPDP, PCI DSS, HIPAA 174 controls Gaps AI Officer	LIVE
Risk Management	Risk Lens	Risk register, 5x5 heat map, treatments, reviews, AI Risk Officer	LIVE
Controls	Control Center	6-component Control Health Score, testing, cross-framework mapping, AI advisor	LIVE
Audits	Audit Management	Full audit lifecycle, findings, CAPAs, AI Auditor, PDF reports	LIVE
Policy	Policy Governance	Policy lifecycle, versioning, attestations, Policy Health, AI advisor	LIVE
Privacy	DPDP Privacy	India DPDP Act 2023, data assets, consent records, DSRs, PIAs	LIVE
Issues	Issue & Remediation Hub	Central issue registry, tasks, exceptions, escalations, SLA tracking, AI planner	LIVE
Workflows	Workflow Studio	Governance automation engine, approval flows, AI generator	LIVE

Layer 3 - Trust Intelligence

Module	AUDT Name	Key Capabilities	Status
Org Trust Score	Trust Intelligence	5-component Org Trust Score, Trust Velocity, Trust Explainability, Governance Copilot	LIVE

Governance Trends	Governance Trends	90-day sparklines, Projected Trust Decay, Trust Recovery Plan	LIVE
Monitoring	Continuous Monitoring	7 automated monitoring rules, governance alerts, resolve flow	LIVE
Governance Graph	Trust Graph	Force-directed entity graph, Root Cause Analysis, Impact Analysis, AI Reasoner	LIVE
Benchmarking	Governance Benchmarking	10-category industry peer comparison, percentile engine, maturity ladder, AI analyst	LIVE
Executive Reporting	Executive Reporting	6 role dashboards, board reports, predictive forecasting, scorecards, AI analyst	LIVE

Layer 4 - Trust Network & External

Module	AUDT Name	Key Capabilities	Status
Trust Exchange	Third-Party Risk Exchange	Trust profiles, evidence exchange, badges, questionnaire exchange, vendor directory	LIVE
Trust Network	Trust Network	Public trust profiles, network reputation score, governance maturity, follow graph	LIVE
Auditor Portal	Auditor Collaboration	Audit rooms, evidence exchange, external findings, assessor RBAC	LIVE
Verification	Trust Verification Authority	10 verification programs, AUDT Verified certificates, public registry, renewal mgmt	LIVE
Trust API	Trust API Platform	8 API products, webhooks, developer portal, usage analytics, AI API builder	LIVE

Layer 5 - Enterprise, Security & AI

Module	AUDT Name	Key Capabilities	Status
Security	Security Command Center	MFA, SSO, session governance, IP allow lists, CMK, AI security, vendor monitoring	LIVE
Continuous Compliance	Continuous Compliance	21 automated checks, access reviews, attestations, training campaigns, AI Officer	LIVE
Regulatory	Regulatory Intelligence	18 built-in regulations, change monitor, obligations, compliance horizon, AI advisor	LIVE
AI Governance	AI Governance	AI system inventory, AI Trust Score, EU AI Act / ISO 42001, incident tracker, copilot	LIVE
AI Agents	Governance Agent Framework	6 agent types, observations, recommendations, human-approved actions, copilot	LIVE
Integrations	Integration Hub	35+ connectors, sync engine, webhook engine, evidence collection, AI advisor	LIVE

04 Trust Operations Engine (TOE)

The orchestration layer connecting every governance capability into one intelligent, event-driven platform.

TOE transforms AUDT from a record-keeping system into a proactive governance intelligence platform. It is the central nervous system - every module publishes events into TOE, which routes them to workflows, automation rules, AI decisions, and approval queues.

4 Operational Layers

Layer	What It Does	Scale
Event Engine	37 built-in event types across all 32 modules. Every governance action publishes a structured event with severity, entity, and context.	37 event types
Workflow Engine	6 built-in templates: Vendor Onboarding, Evidence Expiry Response, Trust Score Drop, Contract Renewal, Vendor Offboarding, Critical Risk Escalation. Custom workflows supported.	6 templates
Automation Engine	Event-triggered automation rules (if-this-then-that). Connect any event type to any action across all modules.	Unlimited rules
AI Decision Engine	AI-generated recommendations with confidence scores, impact/effort labels, and action steps. Human-approved action queue. Operations Copilot NL chat.	AI-powered

TOE Hub Pages

Route	Purpose
/operations	TOE Dashboard - metrics, event stream, active workflows, AI advisory, module nav
/operations/command-center	Governance Command Center - cross-module live stats, attention strip
/operations/approvals	Unified Approval Queue - approve/reject with notes, resolved history
/operations/workflows	Workflow Engine - 6 built-in templates + custom workflows + instance history
/operations/automation	Automation Engine - event-to-action rules, toggle/delete, create form
/operations/analytics	Workflow Analytics - by status, by workflow, SLA metrics, historical data
/operations/ai	AI Decision Engine - recommendations panel, advisory, Operations Copilot chat

05

Enterprise Platform Layers

Commercial-grade capabilities for Banking, Fintech, Healthcare, and regulated industries.

Enterprise Authentication (Sprint B2.1)

Feature	Detail
TOTP MFA	Enrollment with QR code, 10 recovery codes, per-org enforcement modes
Password Policies	Configurable complexity, history check, max age, lockout after N failed attempts
Session Governance	Idle timeout, absolute timeout, max concurrent sessions, session revoke per user
Device Trust	djb2 browser fingerprint, 30-day trusted device registry, remember-device at MFA
IP Allow Lists	CIDR-based rules scoped to all/login/api/compliance/vendors resources
Enterprise SSO	Entra ID, Okta, Google Workspace, Ping Identity, SAML 2.0, OIDC. JIT provisioning

Security Command Center - 8 Phases

Phase	Capabilities
MFA Management	Per-org enforcement, per-user status, remember-device policy
IP Allow Lists	CIDR rules, resource-level scoping, enable/disable per rule
Evidence Protection	Expiring share links, watermarking config, per-share access log
AI Security Governance	Prompt audit trail, PII detection, sensitivity classification, blocked prompt tracking
Customer Managed Encryption	AWS KMS, Azure Key Vault, Google KMS provider registry with audit log
Public Trust Center	Per-org trust center config - show/hide trust score, certs, documents
Vendor Monitoring	Domain, SSL, reputation, certificate monitoring assets per vendor
Security Readiness Score	5-component 0-100: MFA(30%) + SSO(20%) + IP(15%) + Monitoring(20%) + AI(15%). Levels: Enterprise Ready / Strong / Moderate

06 Competitive Landscape

AUDT has achieved category leadership across all dimensions previously marked as gaps.

The original v1 blueprint identified Trust Intelligence, Trust Score, Trust Graph, and continuous monitoring as future/planned capabilities. All are now fully shipped and form AUDT's core differentiation.

Capability	Vendor Risk Tools	GRC Suites	Vanta/Drata	AUDT
AI-Native Architecture	None	Bolt-on	Limited	Core - Gemini 2.5 Flash throughout
Org Trust Score	None	None	None	5-component real-time score
Vendor Trust Score	Basic rating	Manual	None	7-component per-vendor score
Trust Graph	None	None	None	Force-directed entity graph + AI reasoning
Governance Agent Framework	None	None	None	6 agent types, observations, recommendations
Trust Operations Engine	None	None	None	37 event types, 6 workflow templates, automation
Trust Verification Authority	None	None	None	AUDT Verified certs, public registry, passports
India DPDP Compliance	None	None	None	Full DPDP Privacy module + built-in regulation
India Data Residency	None	Varies	US-only	Mumbai (ap-south-1) guaranteed
Continuous Compliance	None	Manual	Yes	21 automated checks + evidence automation
Regulatory Intelligence	None	Limited	None	18 built-in regulations, change monitor, horizon
Executive Board Reports	Basic	Yes	Basic	8 board types + AI narrative + forecasting
Trust API Infrastructure	None	None	None	8 API products, webhooks, developer portal

07

Commercial Foundation & Deployment

Deployment

Item	Detail
Production URL	https://audt.tech (DNS propagating) + https://lekha-os.vercel.app (always available)
Hosting	Vercel (bom1 Mumbai edge) + Supabase ap-south-1 Postgres
Data Residency	100% India - Mumbai for both compute and database. DPDP-ready.
Database	259+ tables across 41 migrations. RLS on every table. AES-256-GCM integration encryption.
API	OpenAPI 3.1 spec at /api/docs Swagger UI at /api/docs/ui 60+ REST endpoints
Trust Center	Public /trust/* pages - architecture, frameworks, encryption, data protection, privacy, AI, contact

Plan Tiers & Entitlements

Plan	Key Features	Keys
Growth	Core GRC: Vendor Hub, Evidence Vault, Risk Lens, Control Center, Audit, Trust Intelligence, Contract Governance, Policy, DPDP, Issue Hub, Workflow Studio, Trust Exchange, Trust Graph, Governance Trends	14
Business	Growth + AI Governance, Governance Agents, Executive Reporting, Benchmarking, API Access, Integration Hub, Security Command Center, Continuous Compliance, Auditor Collaboration, Trust Verification, Trust Network, Regulatory Intelligence, Asset Intelligence, Unlimited vendors/users	28
Enterprise	Business + Customer Managed Keys (CMK), SSO, SCIM, Dedicated Success Manager	32

India-First Billing Architecture

Manual bank-transfer SaaS billing - no Stripe dependency. Architecture: Subscription Engine -> Billing Engine -> Payment Provider Adapter -> Manual Invoice / Bank Transfer. GST 18% computation, invoice PDF generation, Finance Console for manual payment verification. Razorpay/Stripe as future plugins via provider registry.

08

Target Customer Profiles

Segment	Pain Points AUDT Solves	Key Modules
SaaS (50-500 employees)	SOC 2 / ISO 27001 readiness, vendor sprawl, no centralized risk tracking	Evidence Vault, Vendor Hub, Risk Lens, Trust Verification
Fintech (RBI/SEBI regulated)	Regulatory compliance (RBI CSF, SEBI CSCRF), vendor risk, DPDP obligations	Regulatory Intelligence, DPDP Privacy, Audit Mgmt, Control Center
Healthcare (HIPAA/DPDP)	Patient data governance, HIPAA controls, vendor BA agreements, data retention	DPDP Privacy, Evidence Vault, Contract Governance, Asset Intelligence
Manufacturing/IT Services	Supply chain vendor risk, ISO 27001, contract obligations, third-party audits	Vendor Hub, Contract Governance, Auditor Collaboration, Trust Exchange
Enterprise (1000+ employees)	Board governance, cross-BU risk aggregation, regulatory horizon, AI governance	Trust Intelligence, Executive Reporting, TOE, AI Governance, Governance Agents

The AUDT Governance Journey

Stage	Outcome	AUDT Module
1. Discover & Onboard	Register vendors, set up org, invite team	Vendor Hub + 3-step Onboarding Wizard
2. Govern & Classify	Risk-score vendors, collect evidence, map controls	Risk Lens + Evidence Vault + Control Center
3. Audit & Verify	Run compliance audits, generate findings, track CAPAs	Audit Management + Continuous Compliance
4. Operate Continuously	Automate governance workflows, resolve issues, enforce policies	TOE + Workflow Studio + Issue Hub
5. Publish Trust	Issue trust certificates, share via API, benchmark vs industry	Trust Verification + Trust API + Benchmarking
6. Evolve with AI	Agent-driven monitoring, AI recommendations, regulatory horizon	Governance Agents + Regulatory Intelligence + AI Governance

09

Strategic Conclusion & Category Leadership

What Has Changed Since v1

v1 Blueprint Said	v2 Reality
Category: Vendor Governance & Trust Operations (VGTO)	Category: AI-Native Trust, Risk & Compliance Platform (Governance OS)
AI Governance - Planned/Early	AI Governance - LIVE with AI Trust Score, EU AI Act, incident tracker
Trust Score - Future Module	Trust Score - LIVE, 7-component engine, feeds Org Trust Score and benchmarking
Trust Graph - Future Module	Trust Graph - LIVE, force-directed SVG, Root Cause + Impact Analysis + AI Reasoner
Continuous Monitoring - Missing	Continuous Monitoring - LIVE, 7 automated rules, integrated in Trust Intelligence
Vendor Offboarding - Missing	Vendor Offboarding - LIVE, 9-step checklist, auto-transition to offboarded
Contract Renewal - Missing	Contract Renewal - LIVE, AI assessment, 5 recommendation types, renewal workspace
Governance Copilot - Future	Governance Copilot - LIVE in 15+ modules as contextual NL chat
Trust Benchmarking - Future	Governance Benchmarking - LIVE, 10 categories, percentile engine, maturity ladder
Trust Exchange - Future	Third-Party Risk Exchange - LIVE, evidence exchange, badges, questionnaire sharing
Trust Verification - Future	AUDT Verified - LIVE, 10 programs, public certs, verify.audt.tech QR codes
6 modules described	32 modules fully shipped and live in production

Category Leadership Achieved

AUDT has moved from a vision to a fully realized platform. The 32-module Governance OS covers every dimension of organizational trust - vendor governance, compliance, risk, audits, policies, privacy, AI governance, contracts, issues, workflows, external trust, regulatory intelligence, and security - orchestrated through the Trust Operations Engine and surfaced through Trust Intelligence.

The competitive moat is structural: no point solution can match the depth of integrated governance, the AI-native continuous monitoring, or the external trust publishing infrastructure (Trust Certificates, Trust API, Trust Network). AUDT is not a feature - it is the operating system for organizational governance.

AUDT - Governance Built on Proof.

32 modules. 259+ tables. AI-native. India data residency. The only platform where governance is continuous, trust is computed, and proof is published.
