

# LEKHA OS

## Compliance Module V1

### Product Specification

Version 1.0

---

## Objective

Transform Lekha from a Vendor Governance platform into a Compliance Management Platform.

The Compliance module should allow organizations to:

- Manage compliance frameworks
- Track controls
- Map evidence
- Measure readiness
- Identify gaps
- Generate compliance reports

This release should leverage data already available within the Vendor Governance module.

The Compliance module becomes the system of record for organizational compliance readiness.

---

## Core Principle

Vendor Module produces evidence.

Compliance Module consumes evidence.

Example:

Vendor Document

↓

Evidence

↓

Control

↓

Framework

↓

Readiness Score

---

## MVP Scope

The first version of Compliance focuses on:

- Framework Management
- Control Management
- Evidence Mapping
- Policy Management
- Readiness Scoring
- Gap Analysis
- AI Compliance Officer

No audit workflows.

No DPDP workflows.

No risk register.

No remediation engine.

---

## Navigation

Add new menu:

Compliance

Subsections:

Dashboard

Frameworks

Controls

Evidence

Policies

Reports

AI Compliance Officer

---

## Module 1

# Compliance Dashboard

Purpose:

Single view of compliance posture.

---

## Dashboard Widgets

Overall Compliance Score

Framework Readiness

Open Gaps

Controls Implemented

Evidence Coverage

Policies Active

Recent Compliance Activity

---

## Example

Overall Readiness

82%

Frameworks

3

Controls

127

Implemented

95

Partial

18

Missing

14

---

## Module 2

### Framework Library

Purpose:

Manage compliance frameworks.

---

#### Supported Frameworks

ISO27001

SOC2

DPDP

PCI DSS

HIPAA

## Framework Fields

---

## Module 5

### Evidence Mapping

Purpose:

Connect evidence to controls.

---

### Mapping Example

Vendor:

AWS

Document:

SOC2 Report

Mapped To:

SOC2 CC1.2

SOC2 CC6.1

ISO27001 A.15

---

## Features

Manual Mapping

Bulk Mapping

AI Suggested Mapping

Control Coverage View

---

## Coverage View

Control

Mapped Evidence

## Example

Framework:

ISO27001

Total Controls:

93

Implemented:

71

Partial:

12

Missing:

10

Readiness:

82%

---

## Module 8

### Readiness Scoring

Purpose:

Measure compliance maturity.

---

## Inputs

Control Status

Evidence Coverage

Policy Coverage

Review Completion

Vendor Compliance Data

---

## Outputs

Framework Readiness

Overall Compliance Score

Control Health

Coverage Percentage

---

## Example

ISO27001

82%

SOC2

74%

DPDP

21%

Overall

76%

---

# Module 9

## AI Compliance Officer

Purpose:

Provide compliance guidance.

---

### Capabilities

Framework Summary

Control Explanation

Gap Analysis

Evidence Recommendations

Readiness Explanation

Policy Recommendations

Compliance Insights

---

### Example Questions

What controls are missing for ISO27001?

Why is SOC2 readiness low?

Show controls with no evidence.

Which vendors impact compliance most?

Summarize compliance posture.

---

### AI Outputs

Compliance Summary

Gap Summary

Control Recommendations

Evidence Recommendations

Executive Insights

---

## Module 10

# Compliance Reports

Purpose:

Generate executive reporting.

---

## Reports

Framework Readiness Report

Control Coverage Report

Evidence Coverage Report

Gap Analysis Report

Policy Status Report

Executive Compliance Summary

---

## Export Formats

PDF

## Release Success Criteria

The Compliance Module is considered complete when:

- ✓ Frameworks can be created and managed
  - ✓ Controls can be managed
  - ✓ Evidence can be mapped
  - ✓ Policies can be managed
  - ✓ Readiness scores are calculated
  - ✓ Gap analysis works
  - ✓ Compliance reports can be generated
  - ✓ AI Compliance Officer is operational
  - ✓ Vendor Governance data can be linked into controls
- 

## Out Of Scope

Do NOT build in this release:

Audit Workspace

CAPA

Findings Management

Risk Register

DPDP Workflows

Board Governance

Trust Center

Continuous Monitoring

Third-Party Integrations

These belong to future Lekha OS releases.

---

## Strategic Outcome

After this release, Lekha evolves from:

Vendor Governance Platform

Vendor Governance + Compliance Management Platform

This becomes the foundation for future Audit, Risk, DPDP and Governance modules.
